Street Sweeping
Information

Street Sweeping Program

The San Jacinto Public Works Street Division provides the street sweeping program. The service was implemented on a once a month schedule to improve the cleanliness, health and safety of San Jacinto roadways. Please review the included street sweeping map & schedule to join with us in providing the maximum street sweeper effectiveness in your neighborhood.

Street Sweeping Tips:

- Please park vehicles off the street prior to your scheduled day.
- Remove any trash containers, portable basketball hoops & RV access ramps from the street or gutter.
- Trim any low obstructing tree branches (private trees only).
- Avoid blowing, piling, raking or sweeping leaves or other debris in the street or gutter. Street sweepers are not designed to pick up large pieces, piles or wet debris.

Scheduling Changes:

Scheduling may change due to weather conditions or unforeseen mechanical problems. For example, if the streets are too wet, sweepers cannot remove debris.

Street sweepers remove debris from our streets & prevent it from entering our storm drains. Street sweeping also helps the city comply with state and federal storm water quality requirements.
